

Executive Summary

Claims Committee Meeting, June 13, 2024

Board of Governors Meeting, July 10, 2024

Roof and Property Reporting Services

Topic

This Consent Item seeks Board approval for \$905,000 in additional contract spend under Citizens' current contract with Eagleview Technologies, Inc. for roof and property reporting services. This would result in a total approved spend of \$3,057,000. The Board previously approved \$2,152,000 in spend for the life of this contract in September 2022. Due to higher than anticipated usage, in part due to Hurricane Idalia, there will be insufficient funds to cover expected usage for the remainder of the contract term. It is estimated that the existing approved spend will be depleted by the end of this year. The contract expires on January 28, 2026, with no available renewals.

History

Citizens has contracted with Eagleview Technologies, Inc. for Roof and Property Reporting Services since 2019. Eagleview services provide aerial images of structures and related measurements including angles of roofs, walls, windows, and door openings. The reports integrate with Citizens' claims estimating platform, Xactimate, for automated measurements and sketches of the roofs for loss estimates. This time saving automation is critical in a catastrophe response. The services provide access to nearly two (2) decades of historical imagery, in addition to more than 9.5M miles of new flight imagery collected by Eagleview each year. This makes it possible to efficiently analyze property change over time. Eagleview is also the only geospatial software provider that is integrated with Xactware.

The greatest anticipated benefit of the services will be realized during a large CAT response. In order to expedite the claims handling process, Eagleview roof reports are automatically ordered on every CAT claim. This expedites the process as it often negates the need for the adjuster to physically access the roof and eliminates the need for manual measurements. These reports import automatically into the claim file which speeds up completion of the estimate. In addition to this automation, Eagleview imagery is four (4) times more detailed than standard aerial imagery and seventy (70) times more detailed than standard satellite imagery, and roof measurements are measured to the ninth decimal point. This ensures a level of accuracy beyond that of manual inspection and reduces physical risk to adjusters who no longer must climb ladders and walk roofs.

Eagleview is the only vendor in the marketplace who can provide this type of integrated Roof and Property Reporting Service to Citizens. As a result, Citizens procured these services through a Single Source process in accordance with Citizens' Purchasing Policy and s. 287.057(3)(c), Florida Statutes.

Citizens has ordered approximately 30,000 reports since the new contract was executed on January 29, 2023, with an average monthly volume of approximately 1,900 reports per month. Total contract spend is \$1,352,035 as of May 14, 2024. The estimated cost of the contract, including the \$905,000 in additional requested spend, is not to exceed \$3,057,000.

Recommendation

The recommendation is listed in the attached Consent Item.
